

Drill C

OBJECTIVE

Referee to start facing colour stars with back to drill.

Referee starts at point 'A' on 5th & last tackle. Referee then visualises a ptb and moves off the line as he would normally. He then visualises a kick. He must then scan both sides to pick up coloured hats. He then runs through a series of hats marked in blue where he will step and swerve while evading a crossfield chaser. He will then be required to conduct a 19m sprint in between the two red hats. Once he runs through the last red hat the referee is to reload and then move into a shift play run where the attacker is held in a standing tackle who will offload to a runner. The referee is to loiter at the point of the standing tackle until the offload and conduct at 40m sprint to the red hat marked 'B'.

The defender in the crossfield run must make an effort to run at the referee to make him alter his run speed.
